Education

The Ohio State University **Columbus, OH**
B.S. Electrical and Computer Engineering 09/2026-05/2029

- Minor in Mathematics (Intended)

Skills

Programming Languages: C, C++, Java, Bash, Python, Javascript
Tools: Linux, Git, Nix, Docker, MATLAB, Altium, Onshape, Typst, LaTeX
Other: Microsoldering, 3D Printing

Experience

Formula Buckeyes (FSAE) **Columbus, OH**
Electrical Member 09/2026-Present

- Designed the FB-27 High Voltage Control Unit (Custom PCB).
- Developed firmware to process sensor data and integrate our simlink controls utilizing M1 Build.

WM Iron Patriots Robotics Team (FRC) **East Setauket, NY**
Lead Software Engineer 06/2023-06/2026

- Designed various open/closed loop control systems for teleoperated and autonomous usage.
- Employed simulations to test control loops and interactions between many subsystems.
- Developed and integrated a VSLAM localization system to assist autonomous routines.
- Taught and led a team of 10 Java/C++ developers.

Bilinge Group **New York City, NY**
Internship (remote) 06/2025-09/2025

- Maintenance contributions to custom data analysis software written in Python via Git.

Projects

High Voltage Control Unit

- Designed a Precharge/Discharge system for safely charging our inverters.
- Overhauled our High Voltage indication systems into a more efficient and compact design.
- Created ESP32 firmware for reporting system status via CAN communications
- Utilized Altium to create schematic & layout.

MP3 Player

- Designed a lightweight and compact 'walkman' mp3 player.
- Created custom ESP32 firmware for playback.
- Utilized Altium to create schematic & layout.

Personal NixOS Dotfiles

- Utilized NixOS to configure an immutable and reproducible configuration for all my computers.
- Created various isolated development environments for various projects via Flakes.
